

## Seeknit

Since its establishment in Japan in 1916, Kinki Amibari Co. Ltd. has manufactured bamboo knitting needles using carefully selected, high-quality Japanese Moso bamboo — the finest material for knitting needles — for over 100 years. Throughout this period, we have worked tirelessly to improve quality and develop more user-friendly knitting needles. Our innovations include asymmetric circular needles, rotating swivel cords and interchangeable circular needles.

To celebrate our 100 th anniversary in 2016, we launched a new brand called Seeknit. Our goal is to make the world of creative knitting more accessible. We will continue to contribute to and promote the ongoing culture of knitting.

## Product Feature

### Finely buffed

The finely buffed needle tip makes it easier to pick up stitches.

### Carefully polished

The carefully polished surface is smooth to the touch and the yarn glides easily.

### Laser-print

The size is laser-printed so that it won't rub off.

### Rotating cord

Seeknit circular knitting needles feature a rotating swivel cord that prevents twisting while knitting.

## Two lines of needles

### Koshitsu

Koshitsu are bamboo needles with brown color. After going through our unique high temperature and pressure treatment, Koshitsu needles are carefully polished with natural plant wax. This special treatment gives the bamboo extra durability. It also prevents the needles from warping. The surface treatment makes the needles comfortable and smooth, allowing the yarn to glide easily.

### Shirotake

Shirotake are a bamboo knitting needle with natural color. These needles are softer than our Koshitsu needles, allowing you to enjoy the natural texture and resilience of bamboo. The carefully polished surface and needle tips provide a smooth, comfortable knitting experience.

### 14cm (5.5") L Set Nordic

Koshitsu : 58870 Shirotake : 06457  
Needle sizes : 5, 5.5, 6, 7, 8, 10
